OVERVIEW

- A California hospital / health care focused survey that captures data on key human resources metrics to assist HR leaders in making strategic decisions.
- The survey focuses on human resources structure, unions, operating expense, risk management and workers' compensation, acquisition and recruiting, retention, leaves of absence and shared services.
- Data is displayed in averages and percentiles.
- An executive summary that includes relevant and emerging industry trend commentary.
- Survey participants can order an Individual Facility Report comparing their hospital to all participating hospitals in aggregate.
- Survey alternates biannually with the Employee Benefits Survey.
