

ButterFLi / bus.com

Vaccination efforts powered by ButterFLi & Bus.com

ButterFLi and Bus.com have partnered together to provide a network of local operators powered by technology that offers **on-demand** passenger transportation using its **flexible fleet**.

Collective transportation with the power of scalable efficiency while supporting local economies.

Benefits

- **Single point of contact** for all your transportation needs
- Ability to transport tens of **thousands of people** simultaneously to Los Angeles hospitals and vaccination centers
- **Centralized and digital real-time reporting** → Tracking reports of all passengers and associated contacts in case of outbreaks
- Artificial intelligence-based route **optimization** to minimize costs
- **Volume rebates** and economies of scale through centralization
- **Last minute** bookings
- **Flexible** cancellation and modification
- **Vehicles of all sizes** available with ADA from 1 to 55 passengers throughout North America (including in the most remote communities)

To discuss your ADA needs: delilah@gobutterfli.com (Delilah Lanoix, CEO at ButterFLi Technologies)

To discuss your group transportation needs: oleh@bus.com (Oleh Kaluzny, VP Business Development at Bus.com)
