

# careLearning

## Deliver, Manage and Track Engaging Learning Experiences

careLearning is an online education company designed to help health care organizations by providing reliable, trusted, and easily-accessible talent management solutions.

- **Competency Management:** Define, assess and analyze the skills required for success
- **Learning Management:** Provide, document and report on education that meets highest-priority learning needs
- **Performance Management:** Plan, monitor and review performance

### Learning Management System

- Provide easy access to training to close skill gaps
- Personalize content and gain access to courses developed by peers and experts
- Create and management an unlimited number of your own courses
- Track staff training by groups, departments, or job codes
- Track the expiration dates of professional licenses and certificates; run reports by license type and expiration

#### Tony Wegmann

Client Engagement Specialist, careLearning  
(866) 617-3904  
twegmann@carelearning.com

### Competency Management

- Find employees whose skills best match your needs
- Allow your organization to create individual employee development plans based on the skills required to achieve success
- Align learning resources with identified skill gaps
- Ensure workforce planning, career development and succession planning stays on track

### Performance Management

- Share appraisal templates for performance planning and goal setting
- Performance journals allow continuous feedback between employees and managers
- Create an unlimited number of online appraisal and evaluation templates
- Track the status of each step in the performance management process
