## MAKE AN IMPACT

LEAD Academy is an intensive six-session, 12-module training experience using innovative tools and experiential learning to empower recently hired, newly appointed or previously untrained health care leaders to better understand and use their strengths. Designed for health care supervisors and managers, LEAD is built on the underlying principle that effective leadership requires productive relationships to support excellence in patient care, sustainable business objectives and a safe patient environment.

The program also features local health care executives who will present practical insights on being a leader in the ever-changing and increasingly competitive health care industry.

## ACADEMY OBJECTIVES

At the conclusion of the LEAD Academy, participating health care managers will be able to:

1. Improve the performance of the people and groups that report to them
2. Enhance their contribution to the achievement of facility and system objectives
3. Increase their own self-management skills during everyday and stressful situations

## OUR CURRICULUM

Classroom modules, taught by world-class facilitators, culminate with a certificate of completion. Each session can be taken individually or participants can sign up for the complete program. Organizations interested in a customized program option can contact us for more information and a quote.
