

ONSITE NURSE LEADERSHIP TRAINING

HASC in partnership with Flex Ed is proud to offer leadership development training that can be delivered onsite, at your hospital. These programs are specifically designed to provide participants with new skills needed to be effective in delivering high-quality care, ensuring patient safety and facilitating positive staff development.

The *Charge Nurse Leadership Development* course is designed for the registered nurse in a leadership role. The course facilitates the growth and development of nurses as unit leaders. Advanced leadership strategies, communication techniques, priority setting, and conflict management will be discussed. Practice scenarios are facilitated in group exercises.

Critical thinking is central to effective task management and decision making in high-risk situations. The *Charge Nurse: Critical Thinking Course* reviews how active assessment and analysis of information improves decision making, and discusses the key principles and barriers to thinking critically. The course also covers the application of critical thinking through the nursing process to help staff arrive at logical and appropriate conclusions.

Leadership & Charge Nurse: Creating a Culture of Safety is an advanced course for charge nurses focusing on the role of the nurse leader in creating and developing an atmosphere where all staff feel safe bringing concerns and ideas to improve patient care. The course expands its focus to help nurses improve customer service, continuous survey readiness and response to critical events.

Benefits of Onsite Training:

- Time and convenience — one group or multiple groups, helps with multi-shift operations.
- Continuing education credits are available.
