

**VAP, CLBSI and CAUTI: Quantitative Progress**

August 07, 2012  
Hospital Association of Southern California

---

---

---

---

---

---

---

---

**Project Background**

*Patient Safety First...a California Partnership for Health*

- Funded by Anthem Blue Cross.
- Goal: To improve care, health outcomes and reduce healthcare costs.
- 2012- Third Year of Phase I
- 175 hospitals are participating across the state.
- HASC Region- 90 hospitals are participating to-date.

---

---

---

---

---

---

---

---

**Benefits of Patient Safety First Initiatives:**

- Create broader awareness among hospital administrators, health plans and clinicians about the efforts focused on quality of care and safety of the patients .
- Demonstrate the improvement of system-wide partnership.
- Establish cultures of safety in participating hospitals.
- \$19 Million costs were avoided to-date

---

---

---

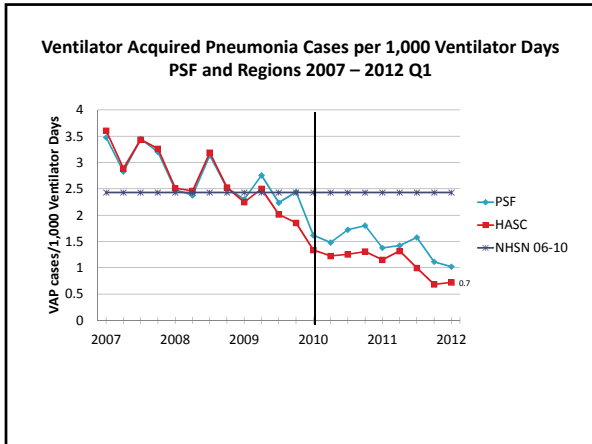

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

**Data Analysis- Snapshot (VAP)**

- 90 Hospitals are reporting VAP data
- 76 hospitals have reported at least 3 quarters of data
  - 62 demonstrated improvement from the Baseline (Zero VAP case/1000 Vent days for 1 and more quarters)
  - 04 showed improvement <1 VAP case/1000 Vent days

---

---

---

---

---

---

---

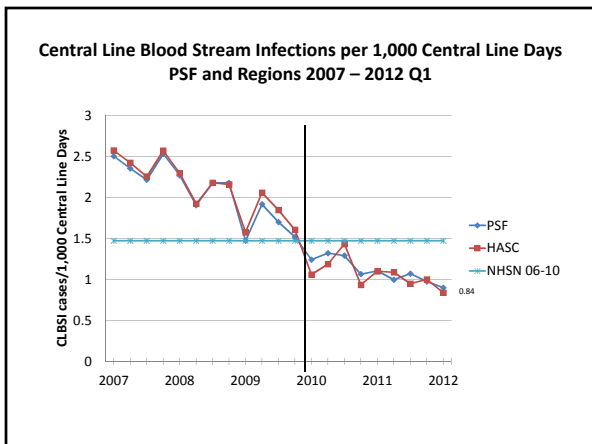

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

### Data Analysis- Snapshot (CLBSI)

- 90 Hospitals are reporting CLBSI data
- 76 hospitals have reported at least 3 quarters of data
  - 45 demonstrated improvement from the Baseline (Zero CLBSI case/1000 Central Line days for 1 and more quarters)
  - 09 improved <1 CLBSI case/1000 Central Line days

---

---

---

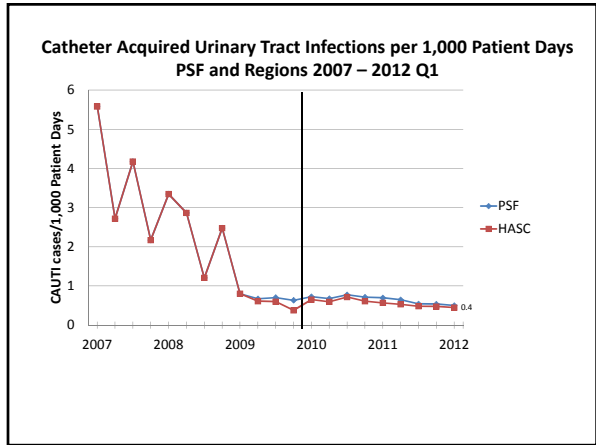

---

---

---

---

---

---

---

---

---

---

---

---

---

### Data Analysis- Snapshot (CAUTI)

- 89 Hospitals are reporting CAUTI data
- 74 hospitals have reported at least 3 quarters of data
  - 28 demonstrated improvement from the Baseline (Zero CAUTI cases for 1 and more quarters)
  - 35 reported <1 CAUTI case

---

---

---

---

---

---

---

---

**Summary**

- >80% of hospitals have shown improvement from the baseline. Way toward a goal of Zero.
- Driver: System-level interventions (e.g. tool kits, Policies/procedures, cultural changing tools)

---

---

---

---

---

---

---

---

**Challenge**

- STAFF TRUN OVER
  - Lack of familiarity with Measures/Data Requirements
  - Lack of Time

---

---

---

---

---

---

---

---

**How Can we Assist You:**

- Consultation!
- Data Collection and Review!
- Data Input
- Graph for presentation

---

---

---

---

---

---

---

---

**Our Patient Safety First Collaborative**

- Identify, validate and disseminate best practices in patient safety.
- Take away more tools and strategies
- Results that help drive patient and staff satisfaction
- \$\$- Cost Saving

---

---

---

---

---

---

---

---

**Next Step:**

Plan to Present Your Outcomes  
As a Speaker with your Team/Colleagues  
or on a Storyboard

November 7<sup>th</sup> 2012

---

---

---

---

---

---

---

---

**Next Step Cont..**

Award/Recognition from HASC

---

---

---

---
